Chemistry Tutorial- Minecraft

Do the following steps in the tutorial. When you have completed the task take a photo using a camera in the game, or a screenshot on the camera. You will need to upload the screenshots or finished journals to teams at the end.

- Element Constructor-
 - a. Create an element using the element constructor
- Compound creator –
 - a. Create Sodium Acetate
- The Lab Table
 - a. Make an Ice Bomb and use it on the water in the courtyard
- Find the Periodic table and take a picture of it
- Make 4 different colour torches
- Balloon testing site
- Create a balloon
- Make Super Fertilizer at the lab table
 - a. Show your garden

Once you have taken screenshots you can upload them to the Teams assignments to show that you have completed it.
