## Minecraft lesson 2 – Scavenger Hunt

### Lesson Objective:

- Search through Minecraft Biomes to find different types of materials and bring them back to the Material reducer to find out what elements make up that material. If it contains Oxygen place the block on the wall to display it.
- Take a screenshot of your completed wall.

### Extension:

- Have a partner pick an element and then go out and find all the materials with that element in it. Fill in your display wall and take a screenshot of your finished wall.

Submit your screenshots to the assignment named "Scavenger hunt in the Team's app.
