

Fossil Unit reviews

Once you are done your study notes you can make up your study cards (term on one side and answer on the other)

Make sure you know the following terms: Set up your paper like this

Term or Question

What are Fossils?

Why are only a tiny fractions of organisms preserved?

What is a fossil record?

What is a geologic time scale?

Where is the Oldest fossil in Canada? How old?

What is relative dating?

Principle of Original Horizontality?

Principle of Superposition

Principle of Original Continuity?

Principle of cross-cutting?

What does uniformitarianism mean?

Principle of inclusions

How has the fossil record provided us evidence for changes in biodiversity over geological time?

Review your cross sections of strata layers to know which one come first.

Oldest to youngest
